Mental Health aWHEREness

An **online platform** and **map** that shows the locations and information of **mental health services** and **resources**.

OSM FOR MENTAL HEALTH AWARENESS

Maps can show where the nearest help is and encourage people to seek professional help.
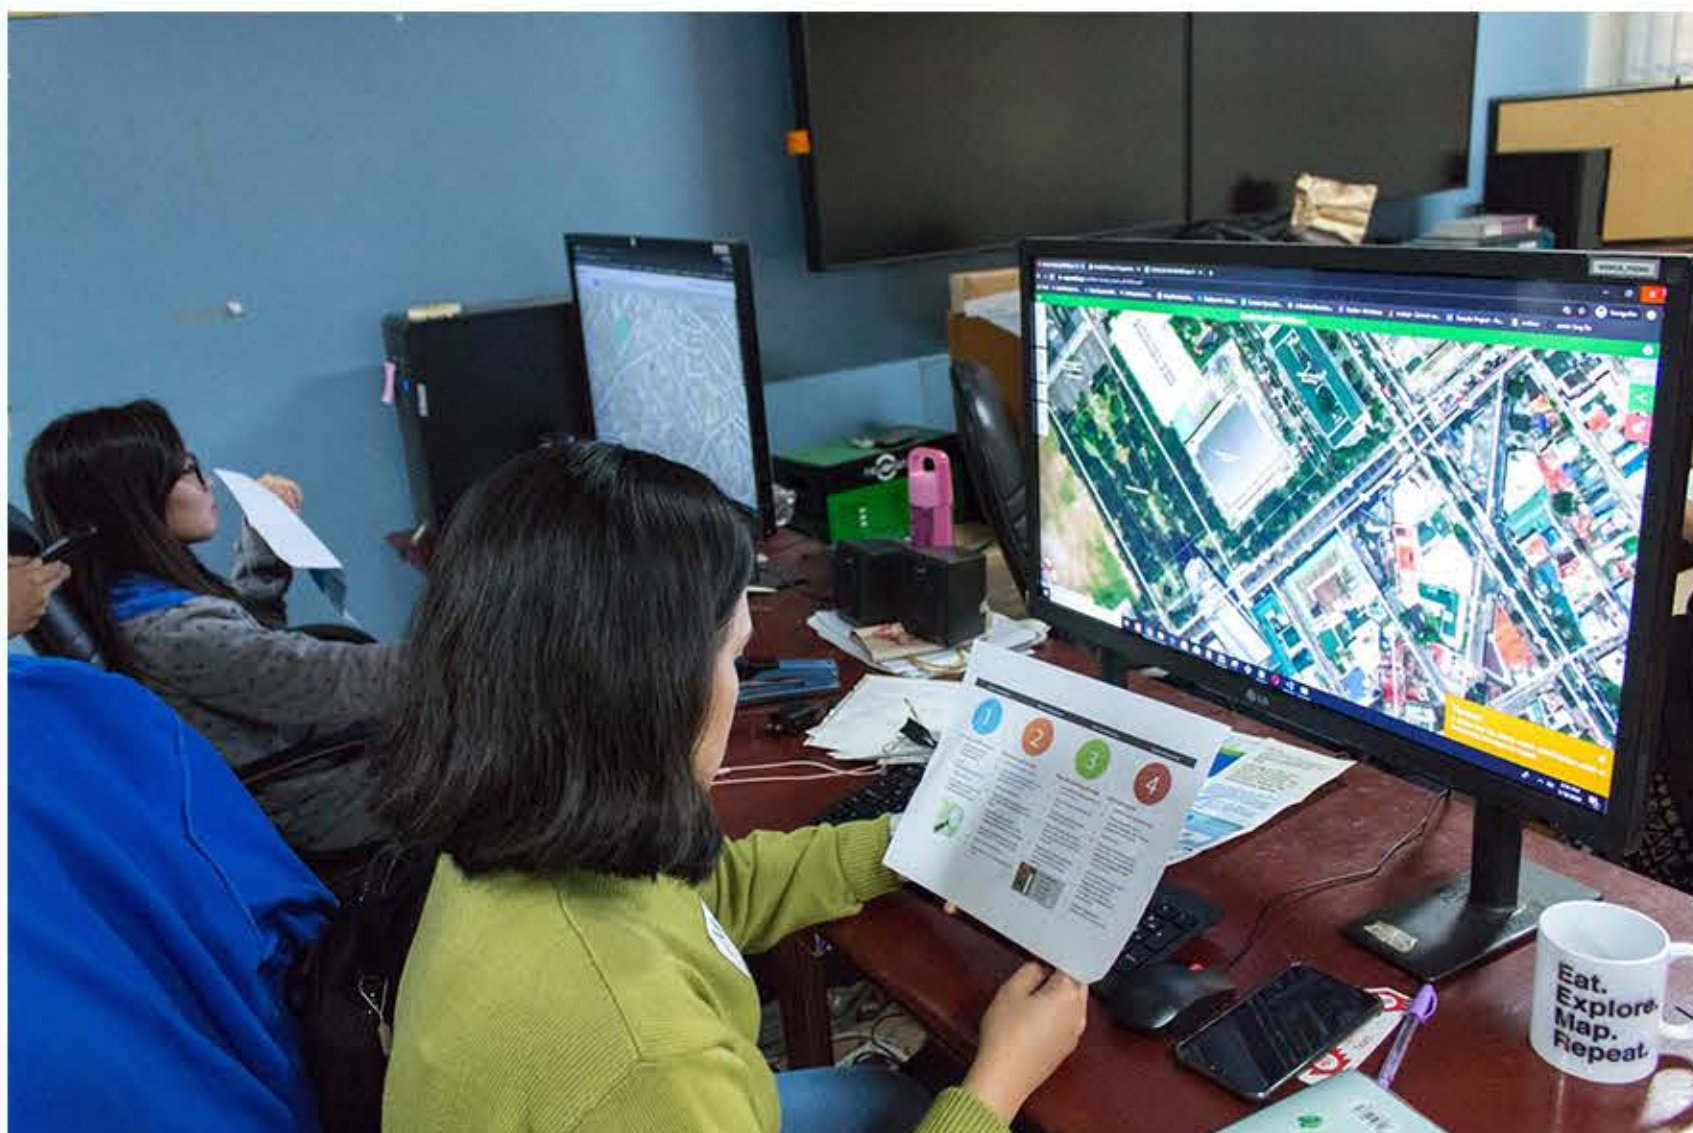

We encourage volunteers to help by contributing their local knowledge to map mental health services and facilities.

Aside from instructions from the website, mapathons are conducted to teach volunteers to map using OpenStreetMap. Mental health talks are also included in these workshops.
